(54) Title: **TRICK PLAY USING CRT SCAN MODES**

(57) Abstract: Video frames of a performance are provided at times  
at a slower input rate and at other times at a faster input rate. A video  
display is automatically switched to a first display scan mode when  
receiving frames at the slower input rate, and switched to a second  
display scan mode when receiving frames at the faster input rate. The  
second display scan mode being different than the first display scan  
mode. For example, the display scan modes may have different frame  
rates or the first display mode may be progressive and the second dis-  
play scan mode may be interlaced.
